

Cell type

- bundle sheath
- companion cell
- pith
- trichome
- abscission zones
- female reproductive
- mesocarp
- vascular (unspecified)
- bundle-sheath
- endosperm/embryo
- cortex
- seed coat
- unknown
- companion-cell
- mesophyll
- procambium
- male reproductive
- dividing cell
- xylem
- epidermis
- guard cell
- phloem

Auxin = Synthesis + Conjugation + Transport

↓

$A-ARF = \beta_1 \cdot \text{Synthesis} + \beta_2 \cdot \text{Conjugation} + \beta_3 \cdot \text{PAT}$
